

Question: Front-End Design Replication Task

Task:

You are tasked with replicating the above example front-end design to the best of your ability. You should use React to achieve the front-end design.

Criteria:

1. Accuracy in replication and design.
2. The best standards and practices followed for file structure and design implementation.
3. Optional Add-ons as described below.

Add-ons:

1. Well-written documentation of your design and principles in implementation.
2. Responsiveness to different screen sizes and devices.
3. Optimizations and extra features of the front-end.
4. Extra weightage if raw CSS was used instead of external frameworks or samples.
